

SHREE SAWARIYA

Master Hardware & Electrical Product Catalogue Blueprint

3,000 product names across the full store range. This is a seed catalogue for Replit/database import. It is based on common Indian/Mumbai hardware-store categories and online catalogue structures. It does not claim that every SKU is currently stocked by Shree Sawariya.

Photo rule: Use ONE representative image per category. Reuse that same category image for all products in that category initially. For example, all pipe SKUs can use one representative pipe image; all switch SKUs can use one representative switch image. Later, individual product images can be added without changing the catalogue structure.

Total entries: 2,997 Categories: 37

Research basis

The taxonomy was cross-checked against current online Indian/Mumbai sources covering electrical supplies, plumbing pipes and fittings, hand and power tools, fasteners, paints, safety, bathroom products, building materials, furniture hardware and related home-improvement ranges. The goal is a broad local-store catalogue, not a verified live-inventory feed.

Replit implementation rule

Create Category records with id, name, representativeImage and description. Create Product records with id, categoryId, name, specification, price, stock, brand (optional) and image. Initially assign the same representativeImage to every product in its category. This gives the site thousands of product names without requiring thousands of separate photos.
